

SUMMARY

Frontend Developer experienced in building and deploying production-grade web applications using React, Next JS and Node.js. Strong focus on clean architecture, scalable APIs, and cross-platform performance. Proven ability to ship apps end-to-end with solid backend integrations and real-time data flows. Passionate about building impactful, user-focused software.

EXPERIENCE

Software development Engineer-I | MYCLNQ | 01/2025 -PRESENT

- Maintained and enhanced cross-platform web applications built with React JS, TypeScript, and Node.js.
- Optimized web page loading speeds and performance, improving user experience.
- Gained hands-on experience in debugging and testing frontend applications.
- Worked on Zoom SDK for video consultations and integrated payment flows with Payu, and Credimax, increasing transaction reliability by 30%.
- Worked on real-time and production-grade projects including:
 - **LabTest** – A health diagnostic booking platform with seamless test selection and user-friendly interface. [Link](#)
 - **MediXplore** – A medical services aggregator enabling users to explore hospitals, doctors, and services. [Link](#)
 - **Cash Kar Har Kadam** – A rewards-based platform that incentivizes user engagement through cashback offers. [Link](#)
 - **FV Command Center** - Developed and maintained a comprehensive Command Center dashboard for Vietnam FV Hospital, enabling efficient management of patient profiles and video department. Implemented modules for health articles, and T&C publication, ensuring a seamless and user-friendly experience for both admins and patients. [Link](#)

Software developer intern | MYCLNQ | 05/2024 - 12/2024

- Collaborated with a cross-functional team to integrate 5+ essential libraries, enhancing web app functionality and reducing development time and also integrate payment gateway (Payu and Credimax).
- Diagnosed and resolved 10+ critical bugs, improving overall web app stability and reducing crash reports by 30% through effective root cause analysis.

SKILLS AND LANGUAGES

Languages: JavaScript, TypeScript, Java

Frontend: React.js, Next.js, Redux, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, JWT Auth, Strapi

Databases: MongoDB, MySQL

Dev Tools: Git, Postman, Bitbucket, Jira

PROJECTS

Nearby Places Finder App 2024 - [GitHub - sanjeevb013/find-nearby-places](#)

Tech Stack: NextJS, Firebase, Foursquare Api, tailwind, typescript

- Build a responsive web app to help users discover nearby places (hospitals, restaurants, parks, cafes) using their current location. Applied performance optimizations and caching to reduce redundant API calls. Leveraged Next.js features like API routes, and environment variables for a scalable structure, performance optimizations and caching to reduce redundant API calls.

Instagram Clone 2023 - [GitHub - sanjeevb013/Instagram-Clone](#)

Tech Stack: React, Node, JWT Auth, Node JS, MongoDB

- Develop an Instagram clone to enhance proficiency in web development. Build a Feature that generates a new feed for active user and also user can create, remove post, like post, comment on post, user Authentication and authorization.

Cart Shop E Commerce Platform 2023 - [E-commerce/src at main · sanjeevb013/E-commerce · GitHub](#)

- As a web developer, I Develop an e-commerce website to enhance proficiency in web development and showcase expertise in react | redux toolkit | Tailwind

Education

YMCA University -CGPA-7.90

2020-2023

- Bachelor of Computer Application

CETPA Infotech PVT.LTD

2023

- Diploma in MERN STACK DEV

6 months
